

PLACEHOLDER - this is NOT the subject.

Project: c-piscine-shell-00

The subject PDF is 42's document, so this repository does not ship it: it is not ours to republish, and 42 revises subjects between versions. Use the exact version you are graded against.

1. Download the subject of c-piscine-shell-00 from the 42 intranet.
2. Save it in this folder as en.subject.pdf - or es.subject.pdf, etc.
3. Delete this file.

The *.pdf rule in .gitignore keeps your copy out of your commits, so a copy of this repository cannot republish it by accident.

42 also issues resources.tar.gz with this subject. Save it as c-piscine/c-piscine-shell-00/resources.tar.gz

The tests read it there. It is never turned in.
