PLACEHOLDER - this is NOT the subject.

Project: Libft

The subject PDF is 42’s document, so this repository does not ship it:
it is not ours to republish, and 42 revises subjects between versions.
Use the exact version you are graded against.

1. Download the subject of Libft from the 42 intranet.
2. Save it in this folder as en.subject.pdf - or es.subject.pdf, etc.
3. Delete this file.

The *.pdf rule in .gitignore keeps your copy out of your commits,
so a copy of this repository cannot republish it by accident.
